

ENVIRONMENTAL POLICY

Our Environmental Policy is summarized as follows:

INTECH as company considers Environmental matters to be of great importance and pays particular attention to keeping Construction Operations environmentally friendly.

- All storage of paints. Solvents etc., must be stored within a safe storage area designated for such storage.
- Oils and diesels are to be stored in designated areas constructed within the guidelines issued by the National Rivers Authority (NRA). Copy enclosed.
- No fueling of vehicles plant etc. is to take place within 35 meters of rivers, watercourses or drains.
- In the unlikely event of a spillage action must be taken to prevent pollution to watercourses and drains. The local NRA is to be informed immediately. Numbers enclosed.
- All waste must be separated were necessary to ensure such waste is disposed of to a licensed waste disposal tip. Waste transfer notes must be held on site and registered accordingly.
- Always consult your most senior manager/officer as to the correct procedure for disposal of chemicals. Never in any event empty substances or chemicals into drains.
- All plant servicing must take place in a designated area for such operations by Services Field Engineers who are fully equipped and briefed as to dealing with the disposal of any oils, fuel filters, grease cartridges etc. Drip trays are to be used during these operations.
- Any disturbance/damage to trees, vegetation or foliage is to be avoided, where this is unavoidable guidance is to be sought through the site agent.
- Access and exit roads from sites are to be kept clean at all times, warning signs to other road users are to be displayed were required.

The aforementioned objectives are stated with the view of improving our environmental performance.

It is sincerely hoped that any reasonable contractor would share our sentiments and work actively with us to this end.

Signed..........

Managing Director
