

**Project** VSG Alarm Receiving centre and operations room.

**Scope** Two six operator consoles  
Rear supervisor console  
Monitor Wall

The VSG Monitoring Facility is accredited to NSI Gold Cat II ARC standards – and is a unique compliment to any systems installation.

This facility, based at their Northampton Headquarters, is a totally secure base, packed with the latest server technology, backup and recording systems and DSL connectivity. It's the ultimate tool in 24/7 monitored security.

Staffed by dedicated personnel, it provides its client's with the peace of mind that they have their interests under surveillance at all times.

With the monitoring facility having been designed using years of security experience, it is fast becoming recognised as one the best of its kind, able to deliver an outstanding service with a range of bespoke solutions to suit any business or budget.

The control room offers the latest in technology and is designed to facilitate the operators in the smooth running of the necessary operation to be carried out. The design has maximised the space on offer to its full potential whilst still complying with the necessary legislation that governs control room design.
